## LEARNING MANAGEMENT SYSTEM: E_PLATFORM-GHGHCOE

LMS or learning management system is software designed to manage and support efficient learning. College has its own learning management system —E-platform —GHGHCOE which is used for creating, delivering, tracking, and reporting educational courses and outcomes. It is also used to support traditional face-to-face instruction. It also facilitates communication, tracks progress, and keeps records of all important data of students. While it helps the instructors work efficiently, it also caters to the needs of the learners. Teachers create their own content in various formats and also share various *sources* for diverse learning .Students are exposed to diverse learning materials engage more in class and perform better.

College LMS is also used to monitor students' academic performance and develop a holistic assessment system. The assessment system goes both ways Students provide feedback on the e-learning content and interact with teacher and peers through chats. Teachers uploaded assignments directly and allow students to views and complete task on time. Teachers track submissions and maintain a record of all submissions. College LMS also provides teachers a platform where they can develop their own MOOCs course. Online payment option is also available on college LMS. Teachers and students can access LMS through computer/laptop and mobile app by login through their registered email Id or mobile phone number.
