

Remedial Teaching Programme

(15-05-2023 to 26-05-2023)

Remedial Teaching Programme was organized from 15-05-2023 to 26-05-2023 for the B.Ed. Students. Remedial teaching is a teaching that is designed to help students who are falling behind in their studies or having difficulty learning the subject matter. In the remedial teaching programme, we used group tutorial teaching method where the number of students is higher and students are divided into two groups on basis of results of the house examination two groups i.e. Potential Group and Booster Group. Each group contains children with identical difficulties. Group tutorial teaching aims to create a dynamic learning environment that fosters problem solving and active engagement of learners. Remedial teaching aims to bridge learning gaps by providing targeted assistance to students. For instance, if a student is struggling with statistical sums, the remedial tutor identifies this area of difficulty and implements specific strategies to support the student understand and master the concept. This focused approach effectively addresses the learning gap.
